Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-8, 10-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Shim et al. (US 6,640,113, hereinafter “Shim”).

Regarding claims 1-8, 10-18, Shim discloses a mobile system (Figs. 4, 5) comprising:

a mobile communications device (radiotelephone 41) having a first communications link for accessing a remote source of electronic data (Internet is accessed via antenna 45; col. 1, lines 21-29; col. 3, lines 44-45);

a data input interface (keypad 71; col. 3, lines 37-39; col. 4, lines 10-12); and

a sidekick display which communicates with said mobile communications device via a second communications link (display 51 communicates with radiotelephone 41 via a wireless Bluetooth communication link; col. 3, lines 45-57);

wherein said mobile communications device functions as the central data processor (radiotelephone includes a control processor 73; col. 4, lines 11-14).

Regarding claims 6, 14, display 51 is touch sensitive LCD display (col. 3, lines 41-43; col. 2, lines 39-42).

Art Unit: 2643

Regarding claim 13, Shim teaches a wired link between the radiotelephone and the display (flexible cable 35; col. 2, lines 47-54).

Regarding claims 15-16, display 51 inherently converts data received wirelessly via antenna 53 for display using its own power source (col. 3, lines 45-58).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Shim in view of Hack et al. (US 2003/0144034 A1, hereinafter "Hack").

Shim differs from claim 9 in that it does not specify the first communications link as being a WiFi link. However, Hack teaches the well known use of a WiFi link as an alternative to a mobile communications link (page 3, paragraph 36) such that it would have been obvious to an artisan of ordinary skill to use a WiFi link, as taught by Hack, as an alternative to the mobile communication link of Shim for accessing the Internet.

Response to Arguments

5. Applicant's arguments with respect to claims 1-18 have been considered but are moot in view of the new grounds of rejection.

Art Unit: 2643

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Inasaka, Wilcox et al., Miyashita and Kawazoe show other mobile telephones with a separate display.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stella L. Woo whose telephone number is (571) 272-7512. The examiner can normally be reached on Monday-Tuesday, Thursday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Curtis Kuntz can be reached on (571) 272-7499. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
